PARTNERSHIP INVITATION FOR PRECISION AGRICULTURE INCUBATION PROGRAM 4.0

EMPOWERING YOUTH TO TRANSFORM FARMING
THROUGH PRECISION AGRICULTURE TECHNOLOGIES
FOR **AGRICULTURAL DEVELOPMENT**

17th of September 2026

**The President and Leadership Team
International Society of Precision Agriculture (ISPA)**

PROPOSAL FOR STRATEGIC PARTNERSHIP AND ENDORSEMENT BETWEEN PRECISION FIELD ACADEMY AND THE INTERNATIONAL SOCIETY OF PRECISION AGRICULTURE (ISPA) FOR PAIP COHORT 4

Dear President and Members of the ISPA Leadership Team,

On behalf of **Precision Field Academy (PFA)**, we are pleased to formally invite the **International Society of Precision Agriculture (ISPA)** to continue its valued collaboration with us and to partner with us for the upcoming **Precision Agriculture Incubation Program (PAIP) Cohort 4**.

We would first like to sincerely appreciate the International Society of Precision Agriculture for its support, goodwill, and contribution to PAIP from Cohorts 1–3. ISPA's continued association with the programme has added significant value to our efforts to expose emerging agricultural professionals, students, innovators, and entrepreneurs to the science, technologies, practices, and opportunities shaping the future of agriculture.

About PAIP

The **Precision Agriculture Incubation Program (PAIP)** is a practical learning and incubation programme designed to equip young professionals, students, entrepreneurs, innovators, and emerging agricultural leaders with relevant skills for the future of agriculture.

The programme brings together learning and practical exposure across areas including:

- Precision agriculture and digital agriculture
- Agricultural drones and remote sensing
- GIS and geospatial technologies
- Artificial intelligence and data science
- Internet of Things (IoT) and agricultural robotics
- Digital farming and smart agriculture
- Agritech innovation
- Employability and professional development
- Entrepreneurship and venture development

PAIP is designed not only as a training programme but also as a platform for connecting emerging talent with experts, practitioners, institutions, organisations, and opportunities within the evolving agricultural ecosystem.

PAIP Cohort 4 is scheduled to commence in October 2026, with the online track running from 14th October to 6th November 2026.

Further information about the programme is available at:

"Precision Agriculture Incubation Program (PAIP) www.precisionfieldacademy.com/paip

EMPOWERING AFRICA'S NEXT GENERATION OF AGRI-TECH PROFESSIONALS

Alignment with ISPA

We recognise ISPA as a global professional scientific organisation whose mission is to advance the science, education, and practice of precision and digital agriculture globally.

This mission strongly aligns with the objectives of PAIP and our commitment at Precision Field Academy to develop a new generation of professionals who can understand, apply, and advance emerging technologies in agriculture.

We therefore believe that strengthening the relationship between ISPA and PAIP can contribute to building stronger pathways between precision agriculture knowledge, education, industry practice, research, innovation, and emerging talent across Africa and beyond.

Proposed Partnership and Endorsement

For PAIP Cohort 4, we would be honoured to have ISPA continue as a strategic partner and supporting organisation of the programme.

We respectfully seek ISPA's consideration for:

1. Formal endorsement of PAIP Cohort 4 as a programme aligned with the advancement of precision and digital agriculture education and capacity development.
2. Continued partnership and association with PAIP, building upon ISPA's support and engagement with Cohorts 1–3.
3. Support in amplifying the PAIP Cohort 4 opportunity through relevant ISPA communication channels and networks, where appropriate.
4. Encouragement of relevant students, young professionals, researchers, practitioners, and emerging precision agriculture professionals within ISPA's broader community to explore and participate in PAIP.
5. Where feasible, engagement of ISPA members and experts through knowledge-sharing sessions, expert conversations, mentorship, or other appropriate activities within PAIP.
6. Permission to identify ISPA as a Strategic Partner/Supporting Organisation of PAIP Cohort 4 and feature the ISPA name and logo on agreed programme materials, subject to ISPA's approval and brand guidelines.

Value of the Partnership

A continued ISPA–PAIP collaboration can help create greater visibility and access to precision agriculture knowledge for emerging professionals while strengthening connections between global expertise and Africa's next generation of agricultural innovators.

Through the partnership, ISPA would be positioned alongside a practical capacity-building initiative focused on developing talent in precision agriculture, digital agriculture, agricultural technology, innovation, and entrepreneurship.

For Precision Field Academy, ISPA's continued support represents an important connection to the wider global precision agriculture community and reinforces our commitment to delivering learning experiences that are relevant, practical, and internationally connected.

Information Requested from ISPA

To support the coordination and accurate representation of the partnership, we would kindly request, upon confirmation:

1. The official ISPA logo and applicable brand-use guidelines.
2. An approved description/profile of ISPA for use in PAIP communications.
3. ISPA's official website and social media handles for inclusion in relevant programme communications.
4. A designated ISPA contact person for partnership and communication coordination.
5. Any specific requirements or conditions ISPA may have regarding the use of its name, logo, endorsement, or partnership designation.

Our Appreciation

We deeply appreciate ISPA's support and association with PAIP from Cohort 1 through Cohort 3.

Your support has contributed to the continued growth of the programme and to our broader objective of creating practical pathways for emerging agricultural professionals to access knowledge, technology, networks, and opportunities in precision and digital agriculture.

As PAIP enters its fourth cohort, we would be honoured to deepen this relationship and explore new ways of working together to advance precision agriculture education, innovation, and professional development.

We would be delighted to schedule a meeting with the ISPA leadership to present PAIP Cohort 4 in greater detail, discuss the proposed partnership and endorsement, and explore opportunities for deeper collaboration.

Thank you once again for your continued support and consideration. We look forward to strengthening our relationship with the International Society of Precision Agriculture and continuing to build meaningful opportunities for the next generation of agricultural professionals and innovators.

Yours faithfully,

Femi Adekoya,

Vision Lead
