Latin American Community Webinar

Latin American Community Webinar

We would like to invite all to the upcoming Webinar organized by the Latin American Community with the theme: "Precision Agriculture to optimize farm profits and environmental outcomes in Latin America."

The Webinar is scheduled for May 26th, from 10 am to 12 pm CDT (UTC -5). Five speakers from Argentina, Brazil, Chile, Colombia, and Paraguay will present an overview of the recent research, farmer adoption, consumer perception, and company offerings related to the environmental outcomes of adopting Precision Agriculture in their region. After the presentations, the public is invited to contribute questions for a discussion with the panelists.

Register for the webinar here.

Precision Agriculture Definition

Precision Agriculture is a management strategy that gathers, processes and analyzes temporal, spatial and individual plant and animal data and combines it with other information to support management decisions according to estimated variability for improved resource use efficiency, productivity, quality, profitability and sustainability of agricultural production.

The International Society of Precision Agriculture (ISPA) is a non-profit professional scientific organization.
The mission of ISPA is to advance the science of precision agriculture globally.
