The 11th Asian-Australasian Conference on Precision Agriculture (ACPA 11) will be held on October 14-16, 2025 in Chiayi, Taiwan. ACPA is a regular international conference, and it has been held once every two years in Asian-Australasian area. The first ACPA conference was launched in Toyohashi, Japan in 2005, and it continues for twenty years up to now. This conference will provide a valuable platform for scholars, researchers, industry professionals and students to share research results and experience in all area of precision agriculture. It is also very important for us to meet together to discuss and look ahead for the future of precision agriculture. We do believe that this conference will be fruitful to all of you, and it is a great opportunity to make new friends and renew friendship. Welcome to ACPA 11.

Country Representatives serve to help promote ISPA by championing the ISPA mission and purpose globally, in particular, in the country they represent. ISPA is growing internationally so Country Representatives remain an important position to help ISPA best serve people, groups, governments and others, globally connecting them to science and experts.

Please join us in thanking ISPA Country Representative from the Sweden, Mats Söderström.

If you are interested in becoming a Country Representative, please email info@ispag.org with your bio highlighting your experience in precision agriculture and your CV. ISPA requires that all Country Representatives are current members of the society. To become a member, please complete the [membership form](#).

Precision Agriculture Definition

Precision Agriculture is a management strategy that gathers, processes and analyzes temporal, spatial and individual plant and animal data and combines it with other information to support management decisions according to estimated variability for improved resource use efficiency, productivity, quality, profitability and sustainability of agricultural production.

The International Society of Precision Agriculture (ISPA) is a non-profit professional scientific organization.
The mission of ISPA is to advance the science of precision agriculture globally.
